Overview
A Pre-Master’s course forms the foundation for Master’s level study at the University of Wolverhampton. It will help you to develop an understanding of the expectations of postgraduate study, whilst also helping you to develop your English in an academic and subject context.

Special features
• Improve your English language skills in an academic context.
• Develop subject-specific skills to enhance learning on your chosen Master’s course.
• Develop research skills that help you to successfully articulate your views, think critically and become an independent learner.
• Integrate with other students on a range of activities and assessments.

Modules include:
• Academic English for International Students
• English in Context
• Preparing for Postgraduate Study
• Subject-specific modules related to your Master’s course.

Learning activities
Depending on your subject, learning activities may include:
• reading
• case analysis
• group discussions
• problem-based learning
• lectures and workshops
• group and individual tutorials
• personal reflection
• group role play and project work
• assessment preparation and feedback
• individual and group presentations
• studio work or laboratory-based practicals.

Assessment activities
Assessments are designed to help you learn and may include:
• case study analysis
• essays, examinations and in-class tests
• exhibitions and lab reports
• oral presentations
• portfolios
• projects
• research journals
• studio practice and written reports.
